

In addition to employee clocking, the Reader PIN can be used for reader security. It is required to set an Admin lock, but recommended for the Enroll lock, as well.

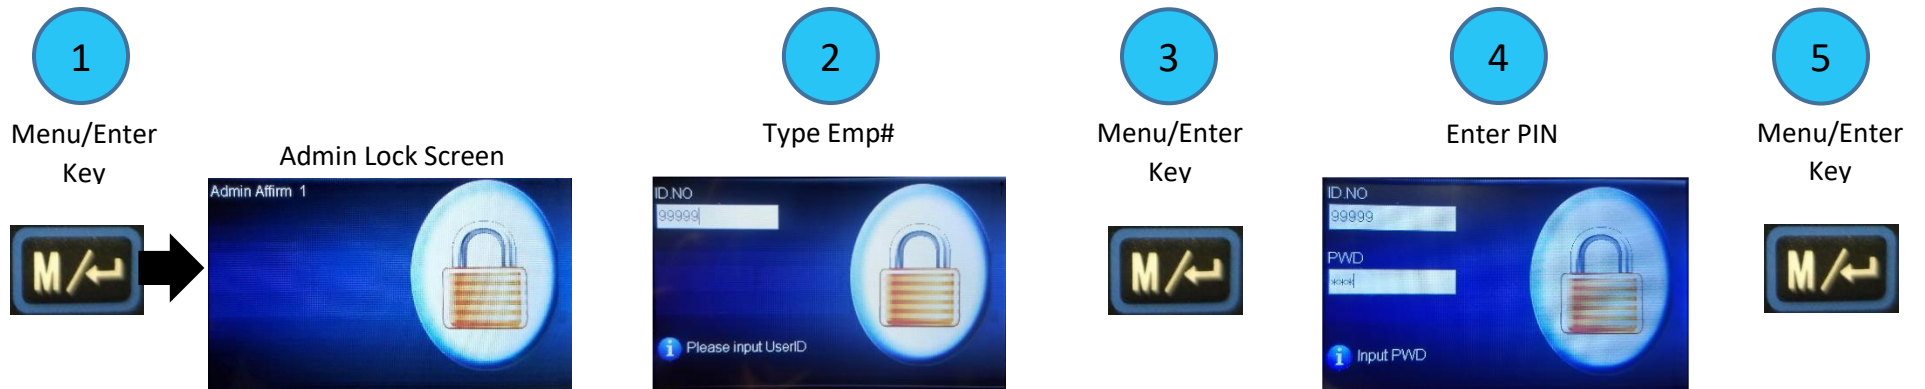

Here are the two types of security locks:

Admin Lock – Locks the reader, requiring an authorized employee # and PIN, fingerprint, or badge to access the menu pages.

Enroll Lock – Requires an authorized employee # and PIN, fingerprint, or badge to access only the menu pages that allow enrollment.

*Admin Lock required to use Enroll Lock.
